

GENERAL

Info: With the W-PEKO® Twin, you can thermoform on both sides of the table — unlocking a whole new level of efficiency and output.

Whether you want to produce two different products at the same time, or run identical molds on both sides for ultra-high-volume production, the W-PEKO® Twin delivers unmatched flexibility and speed.

Plus, this system can be seamlessly combined with all our sublimation machines or heating ovens, giving you the capability to create even more high-quality end products.

Overall Dimensions:

- Rotational vacuum press: 2100 x 1400 mm, H - 1000 mm
- Vacuum station: 1000 x 500 mm, H - 640 mm

Warranty: 1 Year

MACHINE FEATURES

Rotational vacuum membrane press

- Usefull working area: 1200 x 1400 mm
- Two bakelite working tables, grooved for fast air extraction.

Membranes:

- Natural elastomer membrane, 2.5 mm & temperature resistance up to 120°C
- Silicone membrane, 1-2 mm, temperature resistance up to 240°C

Vacuum Station

- High performance oil lubricated vacuum pump
- Final pressure: -997,0/-998,5 mbar
- Inlet capacity: 40 m3/h
- Vacuum tank: 20L
- Power: 1.1 kW
- Digital vacuum switch for automatic stop.
